## Twenty-fourth Annual Catalog of "HARD-TO-GET" Materials.

This catalog is issued primarily for Industrial Arts Departments in high schools, colleges, penal institutions, and hospitals. Also for furniture repair shops, carpenters, cabinet makers, curio and antique shops, millworking establishments and home craftsmen, who manufacture for pleasure and profit.

Because our line consists mostly of unusual items, which cannot be profitably stocked by retail dealers, we do not sell thru stores, but only by mail direct to the consumer. Having been in business nearly a quarter of a century, we have thousands of customers in all parts of the United States and many foreign countries. You will find our prices unusually low. Dealers checking them will find they are, in most instances, as low or lower, than their wholesale costs. We purchase many items in very large quantities and our customers get the benefit of our low costs. To no one, do we quote any other prices or discounts, than shown in this catalog.

This twenty-fourth annual catalog is larger and more complete than any before. Many unusual items have been added. Our line of these exceptional and "Hard-To-Get" Materials is by far, the most complete and comprehensive in the entire country. A careful study of this catalog, will, we believe, verify the above statement. We solicit your orders and pledge courteous treatment, prompt deliveries and guaranteed satisfaction. Our business has been built and operated on these principles.

### TERMS. ETC.

Please read these instructions carefully. Following them will insure prompt attention to your order.

All goods are sold F. O. B. Anoka. Prices in no instance include delivery charges. Under the following conditions we quote a 10 per cent discount for all prices and all special quotations unless otherwise stated.

Our regular terms are cash with order and the 10 per cent discount may be deducted when payment is made this way. Shipment will be made by express collect or by post if sufficient amount is included to cover this charge. It is always best to allow plenty for postage as any unused balance will be immediately returned to you.

Shipment will be made by express or post C. O. D., providing one-half cash accompanies the order. We also allow the 10 per cent discount on C. O. D. shipments.

We recommend that money-order or check be sent with all small orders. The postal department charges 12 cents C. O. D. fee on all orders irrespective of size. You have to pay this collection fee in addition to the postage and on small orders this amounts to considerable. Banks charge exchange on all checks and school orders. Please add 5 cents to all remittances made in above form.

### SCHOOLS AND INDUSTRIAL ART INSTRUCTORS

While our regular terms are cash we are pleased to ship supplies to School Boards and Instructors on open account. This method allows time to receive the goods, check and examine them before payment is made. While it is our intention to be liberal and absolutely fair in this matter we positively cannot deviate from the following rules and continue our open account method. We suggest that Instructors in ordering materials for pupils make collection before placing their order with us.

All orders from Instructors must plainly state whether goods are to be charged to the School Board or to their personal account.

Materials will be shipped to School Boards on open account and the 10 per cent discount allowed if paid for within thirty days from date of shipment or at first meeting following receipt of invoice.

Materials will be shipped to Industrial Arts Instructors on open account. Orders must be written on school stationery. The 10 per cent discount will be allowed if invoice is paid within fifteen days from date of shipment. After this time no discount will be allowed and the account becomes due thirty days from date of shipment. No more goods will be shipped to Instructors who have unpaid invoices over 30 days old.

### SHIPPING

Unless there is some particular reason for requesting shipment by a certain route we suggest this matter be left to our discretion. We have scales giving post and express rates to all parts of the country and can often make considerable saving for our customers. Sometimes one route is cheapest and sometimes the other, depending on the weight and distance. Also certain materials will go more safely by one route than by the other. However, on heavy shipments, we request that you always instruct us whether to ship by freight or express.

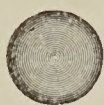

Shipment made by post on open account to schools and Instructors will have postage charged on the invoice.

All parcel post shipments are at purchaser's risk unless sent insured. All charge accounts are insured and insurance charged on the invoice. All cash with order shipments are insured providing enough money is sent for this purpose. Insurance covers both loss and damage and the rates are 5c up to \$5.00 value, 10c up to \$25.00 value and 15c up to \$50.00 value. Be sure to include sufficient for insurance on your cash with order shipments.

## UPHOLSTERY SUPPLIES

**Gimps**—Brown, blue, taupe, red, green, black or eggshell, imitation leather gimp. About one-half inch wide. Price per yard 3c. Per piece, 25 yds. 40c

Per square foot, cut to size.....30c

MODERN IMITATION LEATHERS

- Bright colors** are in unusual demand for modern type furniture. These new imitation leathers are attractive, heavy weight, napped back, soft and pliable. Width 50 inches. Price per running yard.....\$1.95  
Per square foot cut to size.....27c

Colors as listed below—

- Imit. Leather—904 C Spanish Grain—Egg shell color.  
Imit. Leather—531 B Leather Grain—Olive Green color.  
Imit. Leather—396 Leather Grain—Dark Red color.

WRITE FOR SAMPLES

## UPHOLSTERING COVERINGS

Our stock of upholstering fabrics is one of the most complete in the entire country. Prices are exceptionally low. Our customers get the same prompt service on these materials as on the rest of our line.

**Allover Patterns**—An arrangement of design whereby the goods may be cut at any point, just like plain goods, without regard to pattern. Usually these are floral designs or very small figured check patterns.

All the below described upholstery fabrics are 54 inches wide. Orders will be accepted for any fraction of a yard, but we do not cut to size. All prices subject to usual cash discount. Cut goods cannot be returned when sent as ordered. Below prices are subject to regular 10% cash discount and also a quantity discount of 10% in case ten yards or more are ordered of one patterns at one time.

**Samples**—Owing to our large selection of coverings it is not practical for us to mail samples of the entire line. From the descriptive matter you can easily determine which numbers might be suitable for your particular work. Write us and we will promptly mail small clippings of the numbers you designate.

**RR-800—Jaspecurl.** A 100% mohair fabric, part curled yarn and part straight pile. Jaspe effect is given by small broken lines running thru the goods. Extensively used today on good upholstered furniture. Appearance is attractive and wear excellent. Colors are chocolate, green, burgundy and blue. Price per running yard.....\$3.50

**Q600 Plain Mohair.** This fabric, so popular a few years ago, is rapidly regaining prestige. It is a well known fact that mohair yarn will outwear all others. These goods have self toned backs, are soft and tightly woven. They are thoroughly moth treated. For neat appearance and long wear they cannot be excelled. Colors we offer are plain chocolate, wine, green and blue. Price per running yard.....\$3.50

**L400 Velvet.** A well constructed covering made of rayon and cotton yarns, attractively arranged. Medium sized allover scroll pattern. Choice of colors, chocolate, blue, burgundy or rust. Price per running yard.....\$2.25

**N310 Velour.** An inexpensive figured velour, constructed from rayon and cotton yarns. Pattern is allover leaf design. These goods are inexpensive but will wear much better than a low priced tapestry. Choice of colors, blue, green, burgundy, rust or walnut. Price per running yard.....\$1.60

**L158 Tapestry.** A medium weight, closely woven tapestry. Black background, dotted with small sprays of intermingled orange, blue, green and red leaves. This pattern is used extensively on antique furniture. Price per running yard.....\$2.25

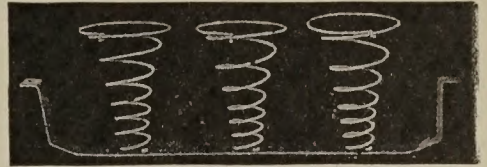

**L200 Tapestry.** A very heavy, tightly woven, plain tapestry, with a small amount of light colored yarn, giving the goods a slightly speckled appearance. Colors are wine, green, rust and brown. Price per running yard \$1.35

**K105 Tapestry.** A low priced cotton tapestry. Has attractive medium sized allover leaf pattern. Satisfactory for an inexpensive covering. Choice of colors, green, plum, rust or blue. Price per running yard.....\$1.00

## V TYPE BAR SPRINGS

These springs can be used on any piece from a good sized footstool to a davenport. They only need to be tied across the top to make an excellent spring seat.

	Height	Extreme Length	No. Springs	Drop	Size Opening	Price Each
No. 1 Bar Spring	5 in.	16 in.	3	2 in.	14 ½ in.	19c
No. 2 Bar Spring	5 in.	18 in.	3	2 in.	16 ½ in.	19c
No. 3 Bar Spring	5 in.	20 in.	3	2 in.	18 ½ in.	19c
No. 4 Bar Spring	5 in.	22 in.	4	2 in.	20 ½ in.	26c

**Inner Spring Construction**—This construction consists of small 3 inch diameter springs by 3 ½ inches high sewed into muslin pockets and pockets sewed together in matts. Upholstered furniture manufacturers use this construction in davenport and chair cushions, rolling it up in layers of felted cotton, compressing and putting in the cushion. The prices below are for the construction and do not include the cotton.

Size 15x21 in., each 85c; 18x18 in., each.....85c  
 18x21 in., each \$1.00; 21x21 in., each.....\$1.15

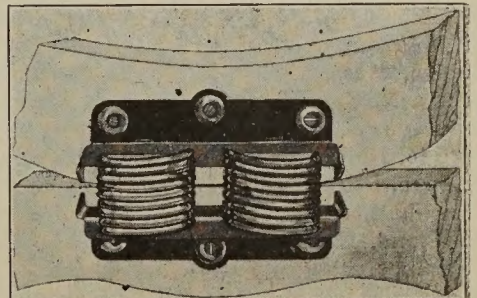

14 inch Upholstery Needle. Straight, double, three square faced point. Each....\$0.22  
 No. 5—Curved Needle. Size 5 inch. Three square face point. Each..... .15  
 No. 5 Regulator. Nine inch size, heavy. Indispensable for upholstery work. Each..\$0.45

**INTERIOR DECORATIONS** by Ross Crane, internationally famous authority on the subject. This book is an authoritative and practical text book on interior decoration, period furniture designs, and room planning, suitable for individual or group study. Has 144 pages of facts and valuable information, with 142 illustrations, many in full color.

Price per copy.....\$2.50  
 Special quotations on quantities for class work.

**No. 9 Spring for platform rocker.** This type rocker is rapidly gaining in popularity, having many advantages over the clumsy old type floor rocker. This is a heavy duty spring unit for a large rocker. Price, per pair, complete with screws .....\$1.25

## MIRRORS

For many years we have shipped mirrors, in both large and small lots, to our customers in all parts of the United States. Our old customers, thru experience, know the quality of goods we furnish. While our prices are unusually low, our mirrors are first class in every way.

All mirrors are made to order only and are shipped in about one week after receipt of order. We furnish mirrors any size or shape and either plain or bevelled edge as desired. There is no extra charge for shaping, but in ordering ovals or shaped, paper patterns, not drawing must be submitted to obviate errors. Being made to order only, mirrors are not returnable when sent as ordered.

Because of liability of price fluctuation we quote no prices here. Send us a list of the goods in which you are interested and we will promptly quote lowest prices. In ordering or requesting quotations, please remember that mirrors are priced by even sizes only. For anything above the even size you are charged for the next even size. For example, a mirror 12  $\frac{1}{4}$  in. by 14  $\frac{1}{4}$  in. would take the 14 in. by 16 in. price, which would be considerably more than for a 12 in. by 14 in. size. If this is kept in mind in making up frames, considerable saving may often be effected, especially on large mirrors.

Most of our call is for French Plate Mirrors. These are heavy plate and give a true reflection.

Plate Glass—Write us for quotations on plate glass, often used for show cases, furniture tops, etc. We can furnish any size or shape. We also have black plate glass.

Extras—Regular plate mirrors or plate glass have rough edges. This, of course, makes no difference where frame is to be used. However, if edges are to be exposed they must be finished. This costs extra. The cheapest way to finish the edge is to have it ground. This smooths the edge, but leaves it dull and cloudy in appearance. For good jobs edges are first ground and afterward polished, giving them the lustre and appearance of the rest of the glass. The price of grinding only is half the cost of a grinding and polishing job. We can furnish mirrors or plate glass with holes bored as desired. Specify size of holes wanted.

Shipping—Small mirrors may be sent safely by parcel post. For larger sizes we recommend express and for heavy shipments freight. If possible specify how shipment is to be made. If left to us we will use our best judgment. For the convenience of our customers, to save shipping charges and to expedite delivery, we have arranged to ship from factories geographically well distributed. They are located as follows:

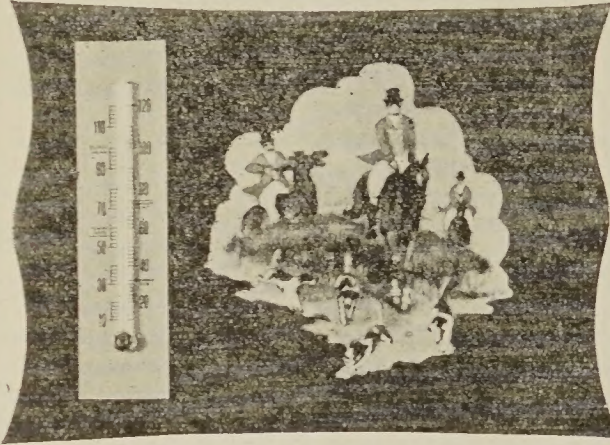

Atlanta, Ga.	Davenport, Iowa	Newark, N. J.
Baltimore, Md.	Denver, Colo.	New Orleans, La.
Birmingham, Ala.	Detroit, Mich.	Oklahoma City, Okla.
Boston, Mass.	Ft. Worth, Texas	Omaha, Neb.
Bronx, N. Y.	High Point, N. C.	Philadelphia, Pa.
Brooklyn, N. Y.	Houston, Texas	Pittsburgh, Pa.
Buffalo, N. Y.	Indianapolis, Ind.	Rochester, N. Y.
Chicago, Ill.	Kansas City, Mo.	San Antonio, Texas
Cincinnati, Ohio	Louisville, Ky.	Springfield, Mass.
Cleveland, Ohio	Memphis, Tenn.	St. Louis, Mo.
Columbus, Ohio	Milwaukee, Wis.	Toledo, Ohio.
Dallas, Texas	Minneapolis, Minn.	Tulsa, Okla.

## A NEW IDEA

A very inexpensive, practical novelty which may be made at a minimum of expense. A little ingenuity in designing and finishing the ply wood panel will produce some unusual effects. The transfer illustrated is our Fox Chase Large, selling at 10 cents. See this catalog for other designs in water transfers. The thermometer is on a gold card size 1 in. by 4 in. It is closely accurate and is graduated from 10 to 120 degrees. If desired a small calendar pad may be attached at the bottom. Many of our customers will make these up in large quantities to be used as Christmas presents, etc.

No. 104 Thermometer on card as shown. Each.....10c  
Per doz. \$1.00. Per hundred.....\$5.00

Note—Above price is for thermometer only—nothing else included.

## NUT BOWL HARDWARE

Anvil and mallet fittings, complete with drawings and detailed information for construction of this project.

Price per set \$1.05. Five set lots \$1.00.

Ten set lots 95c.

Shipping weight, 8 oz. per set.

**CHAIR CANE—  
ALL LONG SELECTED**

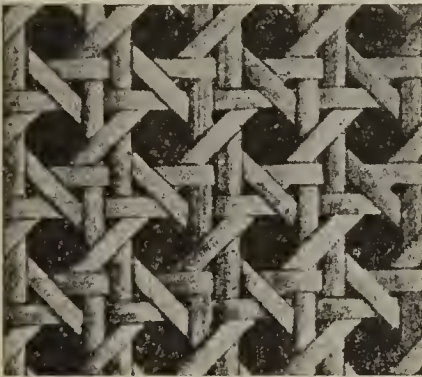

F. Fine    Fine    N. Med.    Medium    Common Binding

When considering chair canes please do not confuse this very highest grade (ALL LONG SELECTED) with the next cheaper grade (EXTRA No. 1) or the still lower grades of "No. 1" and "No. 2."

Chair cane, being in the several grades shown, and ours, the very best that can be offered, is longer, smoother and easier to work than any other cane. If you get the lower qualities of cane the imperfections and short lengths will bring the actual cost per job about as high as the best grade cane would cost. **BUY ONLY THE BEST "ALL LONG SELECTED." IT'S CHEAPER.**

Actual size of "FINE" Webbing.

Fine Fine, per hank of 1000 ft.....	\$1.35
Fine Fine, per ½ hank.....	.93
Fine, per hank of 1000 ft.....	1.50

No. 4 Round Reed, per lb.....	.73	Nos. 7, 8, 9 Round Reed, per lb.....	.40

**FLAT REEDS**

Sizes No. 7, No. 8 and No. 9. In one pound packages. Per lb.....\$0.55

**WIDE BINDING CANE**

Size 5 ½ MM, soft center wide binding cane. Used extensively for weaving seats and backs particularly on porch furniture. Comes in 500 ft. hanks. Price per hank..50c

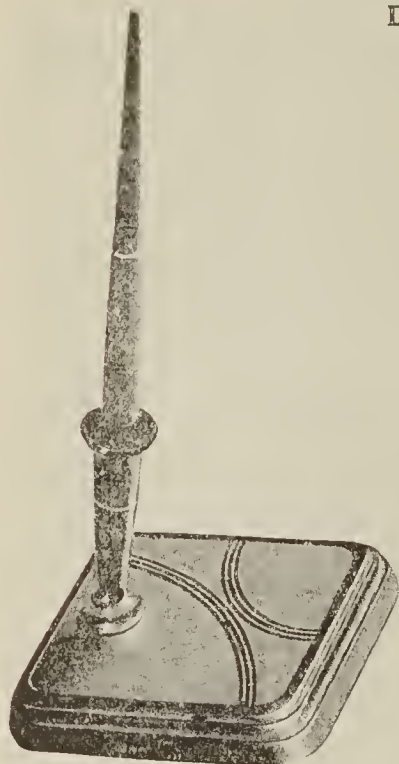

Craft Fibre Cord. Mottled green and brown color, size 4 ½ MM. This material is such an excellent imitation of genuine rush, it is necessary to turn over a seat to determine whether rush or fibre has been used. About two lbs. required for average chair. Finish with varnish or shellac.

Price one pound balls 30c; five pound cartons...\$1.40

## DESK PEN OUTFIT

Consists of pen, funnel and brass fastening with machine screw for attaching. The fastening is rigid, non-adjustable. Base is not furnished and this may be made of wood, metal, stone, pottery, plastic or many other materials. An almost endless number of ideas may be carried out in base design. Both pen and funnel are polished black. The gold plated point has an iridium tip. Band and filling lever are gold plated. Pen only is  $7\frac{1}{4}$  inches long and when fitted in funnel overall length is  $8\frac{3}{8}$  inches. This is a high grade pen made especially for us by a well known factory. You will find it satisfactory in every way. We can furnish the above only as described. No. 10B. Each 85c; lots of six each.....80c

Doz. lots each.....75c

## INLAY PANELS AND STRIPS

Manufactured of various kinds of woods carefully worked into the designs and strips. Illustrations are half size. Strips are 36 inches long and are so priced.

### CEDAR CHEST TRIMMINGS

Solid copper bands for chest trimming. These bands are satin finish, which makes a slightly rough surface and are carefully lacquered to prevent tarnishing. This material is the same as used by several of the best chest manufacturers. The bands come only in lengths and widths specified below. We positively cannot supply other sizes. The copper is thin gauge and the four inch bands may easily be bent to fit around the corners.

No. 63 Chest Lock—All brass. Square selvage. Size 2"x3". 1 1/8 in. from selvage to key pin. Solid box. Two levers. Round link. Two keys, all different in a dozen. Complete with screws. Each \$1.50. Per doz. \$15.00

DUST PROOF STRIPPING FOR CHESTS

Full size illustration.

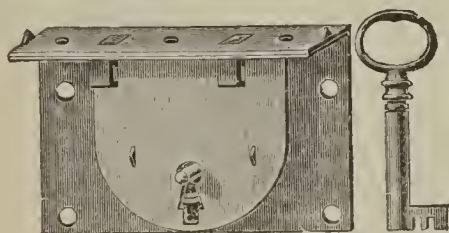

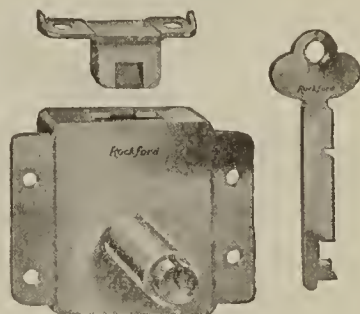

With these strips it is easily possible to make a chest absolutely air tight, not only eliminating any dust, but keeping the cedar lining always fresh. This is important, because if cedar wood is continually exposed to the air, it soon loses its odor and value as a moth repellent.

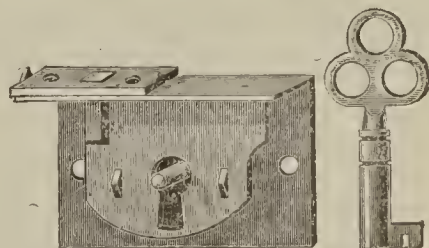

Strips are made of bronze metal, copper plated. Easily applied all around the top edge of the chest by making two saw cuts. Should be mitred at the corners.

No. 48 Strip—Length 48 in., each 25c; per dozen.....\$2.70  
 No. 40 Strip—Length 40 in., each 21c; per dozen.....\$2.27  
 (Suggest use of No. 996 Hinge with above.)

No. 62 Chest Lock—Width 2½ in., height 1⅞ in., for stock about ¾ inch. No mortising necessary, just bore one hole. Locks when cover is closed. Release lock by pressing plunger. Also locks with key. Copper finish, complete with screws and key.  
 Each 35c. Dozen.....\$3.65

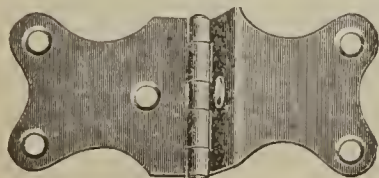

No. 61 Chest Lock—Steel, copper finish. Three in., two levers. 1⅞ in. from selvedge to key pin. Keyed alike. Two coppered keys with each lock and complete with screws.  
 Each 40c. Per dozen.....\$4.20

No. 66 Lock—For small boxes. Size 1⅜ x 1 in. Steel with brass selvedge and back. This lock is too small for chests.  
 Each 30c. Per dozen.....\$3.25

No. 67 Lock—Same as above, except size. 1⅜ x 1⅜". Each 25c. Per doz.....\$2.65

No. 110 Chest Hinge—Copper finish. Length of joint 1½ in., offset ¾ in. Price per pair, complete with screws 17c. Per doz.....\$1.75

No. 111 Chest Hinge—This is a very heavy, strong hinge. Copper finish. Length of joint  $1\frac{1}{2}$  inches, offset  $\frac{3}{4}$  inch. Price per pair, complete with screws.....\$0.20  
Per doz. pair.....\$2.00

No. 112 Chest Hinge—For miniature chest. As above, except one inch joint and  $\frac{3}{8}$  inch offset. Copper finish. Complete with screws. Price per pair.....\$0.10  
Per doz. pair.....\$1.08

No. 33 Cover Support—An excellent support which will not catch and tear clothing in the chest, copper finish,  $6\frac{1}{2}$  inches long. Price per pair, complete with screws..15c  
Per doz. pair .....\$1.50

No. 32 Cover Support—Unquestionably the best cover support ever made for chests. Seven inches long. Copper plated. Price per pair, complete with screws.....22c  
Per doz. pair.....\$2.25

No. 32-9 Cover Support — Same as above, only nine inches long. Price per pair, with screws.....27c  
Per doz. pair.....\$2.85

About  $\frac{1}{3}$  size of No. 32

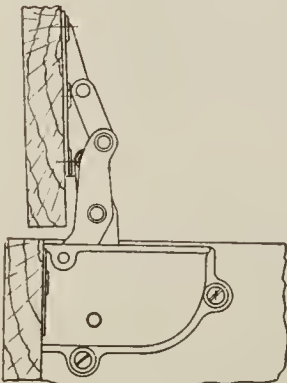

No. 3 Plate Chest Caster—Ball Bearing. Lignum-vitae wheel, size  $1\frac{7}{16} \times 1\frac{3}{16}$  in. Price per set of four, complete with screws.....24c

No. 5 Plate Chest Caster—Ball Bearing. Steel wheel. Size  $1\frac{1}{2} \times 1\frac{1}{16}$  in. Plate size  $1\frac{7}{16} \times 1\frac{3}{16}$  in. Price per set of four, complete with screws.....33c  
Per doz. sets.....\$3.60

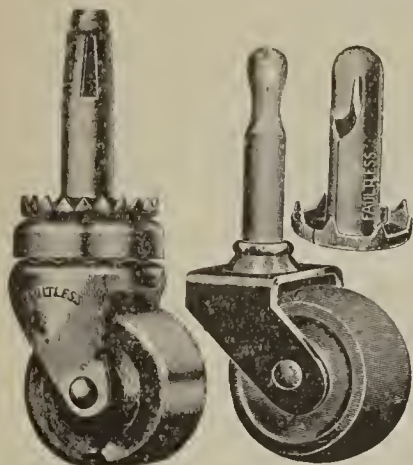

#### RUBBER WHEEL PLATE CASTER

Ball bearing, cadmium plated. Rubber wheel size  $1\frac{1}{4}$  inch. Plate  $1\frac{3}{4} \times 1\frac{3}{16}$  inch. Overall height  $1\frac{3}{4}$  inch. No. 5455. Price per set 50c; per doz, sets.....\$5.40

No. 996 Combination hinge and cover support. Hinges are not necessary and cannot be used with this recently developed device. Extreme width  $4\frac{1}{4}$  inches. Height closed  $2\frac{5}{8}$  inches, extended  $7\frac{1}{4}$  inches. Coppered finish, complete with screws. Price per pair.....45c  
Per doz. pairs.....\$4.50

No. 5 B. B. G. N.

No. 13

No. 13 Chest Caster—Top bearing and short shank. Will turn very easily. Best quality lignumvite wheel. This caster is used by nearly all chest manufacturers and we unqualifyingly recommend it. Wheel  $1\frac{1}{16} \times 1\frac{9}{16}$  in. Price per set of 4, complete with sockets, as shown.....25c  
Per doz. sets .....\$2.64

No. 5 B. B. G. N. Casters—Roller bearing, with steel wheels, as shown. Per set of four, as shown, 33c... Per doz. sets.....\$3.60

No. 5 T. B. Steel Caster—Similar to above, except has top bearing like No. 8, instead of roller bearing. Steel wheel. Per set of four.....25c  
Per doz. sets.....\$2.75

## BALL BEARING FURNITURE CASTERS

### COUNTER SUNK

Round Plate—No. 657 Nickeled  
“Acme” Casters never break or get out of order and move in any direction with the least possible effort. The “Acme” will not tear rugs or carpets, will not bind or rust, will not mark floors. The “Acme” will make furniture look better, last longer and roll easier.

### FAULTLESS CUSHION GLIDES (Pat. Pending)

Faultless Cushion Chair Glides are made of hardened steel with rubber insulation. The center pin is flexible so the glide can fit closely to the chair leg. The glide is braced by an inner frame construction. Rounded corners—move chairs easily over floors. Drive on to chair with hammer. No holes to drill. Finished in Oxidized Copper. Packed six sets to the box.

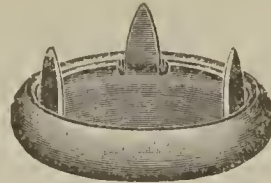

NRS  $\frac{3}{8}$ " diameter, per set of four.....20c  
NRS  $1\frac{1}{8}$ " diameter, per set of four.....25c  
NRS  $1\frac{1}{4}$ " diameter, per set of four.....30c

Above glides are very quiet on concrete, tile or similar floors but also work well on hardwood or carpet floors.

## JOHNSON'S ARTISTIC WOOD FINISHES

The finishing of manual training products is assuming more and more importance every year. We believe this line of finishes to be the best on the market for use in the school shop. They are of the highest grade, very easy to apply and dry quickly. Johnson's Artistic Wood Finishes are used in nine-tenths of the schools in the United States and Canada.

You will notice we offer a good selection of shades. All shades of wood dye may be lightened or darkened. Complete instructions are given on every label. By lightening, darkening or intermixing, hundreds of different effects are easily obtainable. Booklet on these materials, showing colors, etc., sent free to any instructor.

## WATER SOLUBLE STAINS

We take great pleasure in offering this superior line of stains made by a manufacturer who has an enviable reputation for high grade finishing materials. Buying your stain in powder instead of liquid form eliminates excessive transportation charges, as well as loss from breakage and evaporation. Small quantities may be mixed up as desired. Our water soluble stains deeply penetrate the fibre of the wood, giving permanent, transparent and lustrous results, allowing the grain and figure of the wood to show to best advantage.

## GENERAL INSTRUCTIONS

While directions for each particular stain is printed on container the following general instructions are applicable. Each pound of powder makes from two to twelve gallons of stain according to particular stain and color desired. Do not pour water on the stain; put the stain into the hot water. The piece to be finished should have been sponged with water to raise the grain, allowing to dry and carefully sanded. Allow the stain to cool, then apply with brush or sponge. The stain will not show laps when finished, but will show darker where applied heaviest. It is well to take up with a cloth or brush any excess stain in crevices, on mouldings and on end grain wood. For lighter effects add more water and for darker apply two coats of stain or more powder to the solution. When dry, sandpaper carefully with "00" paper. Some users apply a thin wash of shellac before sanding as this makes the wood fibre more brittle and easier to cut on the hard parts and edge of the wood. If the wood is open grained it should now be filled with a thin paste filler colored to match the stain. Wipe off, allow to dry and apply a coat of orange or white shellac. The piece may now be finished with more shellac and waxed or may be varnished with as many coats as quality of work demands.

## DRY POWDER WATER STAINS IN SMALL PACKAGES

For the convenience of our customers, we are now putting up all of the above colors in one ounce packages, complete with directions. This is sufficient to make from one to two quarts of liquid stain, depending on color and strength desired. This is by far the most economical and satisfactory way to buy stain where only a small quantity is desired. Can be shipped by post very cheaply while liquid stains in glass must be sent by express or freight. Order above stain by number and specify one ounce packages. Price per package, any color.....30c

### LePAGE'S LIQUID GLUE

The different sizes or cans have outside friction tops that are easily removed and quickly closed. This feature makes LePage's a safe package to carry in tool bag, chest or auto.

Carpenters, mechanics, in fact, all glue users, prefer this type of package because the patented top keeps the glue ready-to-use. No heating required — no dumping into pots — no waste — every drop usable. Every batch of glue is tested to give high standard results. No better cold glue made.

### CABINET GLUE

This is a very high grade dry flake glue and is made for us by one of the largest and oldest glue manufacturers in the country. This special blend has given our customers years of satisfaction. We offer it in full confidence that it will perform equally with the best of its kind.

Dry Flake Glue, per lb.	40c
25 pound lots, per lb.	35c
100 pound lots, per lb.	33c

### PREPARATION FLAKE GLUE

Soak for two hours in cold water using one part glue and two parts water. When flakes are soft apply heat in double jacketed container not to exceed 160° F. Never boil. In the event any glue is left in pot overnight just reheat but do not add more water as it might be too dilute for good join work. The incubation period for this glue is 84 hours but suggest cleaning out glue pots at least once or twice a week. For hardwood such as birch, maple, etc., a thin solution is suggested. For pine, oak, and spruce a heavier concentration is recommended.

### STICK SHELLAC

Stick Shellac—About 7 inches long, a cement for filling holes and scratches.

When melted into holes, dents and scratches it can be sandpapered smooth and polished. Our cement will not shrink or check and its extreme toughness insures permanency of repair. Price per stick..... 12c

Price per dozen.....\$1.10

## HOW TO MAKE VENEERED PANELS

Booklet by Herman Hjorth, M. S. Fully illustrated. Four easily made veneering projects are included with full instructions for cutting the veneers, gluing and finishing. Clothbound; 96 pages! 70 illustrations; 55c.

**CASCO  
WATER  
PROOF  
GLUE**  
(Grade A)

**Description**—Brown powder; makes light brown liquid glue. Mixed daily as required. Glues all woods, hard and soft. Shows edge joint stain on acid woods such as oak and mahogany. Penetrates and sometimes stains the surface of thin veneers.

**Uses**—For gluing joints and veneers; boats, outdoor work of all kinds. For household repairs, etc. For gluing metal to wood, and all difficult gluing jobs. Quick setting; suitable for dowel and assembly work, etc.

**CASCO  
No 2  
White  
GLUE**

**Description**—White powder; makes white liquid glue. Liquid glue does not thicken—stays at full strength 3 days. Glues oak, mahogany, pine, etc., free of stain.

**Uses**—For gluing joints, veneers and inlays free of stain. For making furniture panels and general veneering. For all furniture and cabinet work where waterproof glue is not essential. For gluing jig-saw puzzle pictures, lithographs, etc.

Shipping weight, per set, 2 lbs.

No. 19½ Bed Fastener—Same as No. 19 except 5 in. Price per set of four.....66c

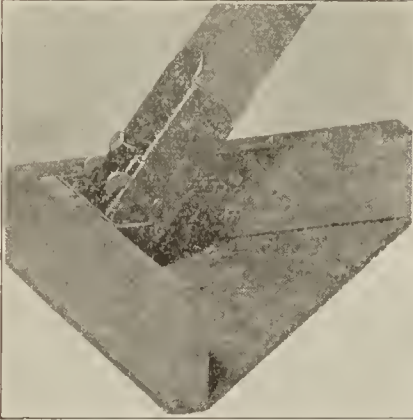

## WROUGHT STEEL BED LOCK

No. 1918 Wrought Steel Bed Lock. Set consists of two rods, two draw nuts and two pins. Side rails are grooved to permit rods to be recessed. Both ends of rails should have two dowels, which fit into holes bored on the inside of both posts. Foot posts must be slotted to permit hook to fasten over pin which is driven thru side of post. Back side of head post is bored to receive draw nut. Turning up this draw nut insures a rigid, positive locked bed. This installation permits use of narrow side rails.

Rods are 79¾ in. long, for use with 1½ in. to 3 in. bed posts. This is an excellent device for repairing old beds. Shipping weight 8 lbs. Price per set.....\$1.00

## CARD TABLE LEG SUPPORTS

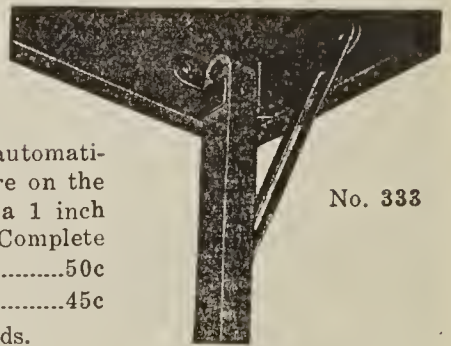

No. 476 Card Table Fixture. This is the newest and finest brace ever devised. For one inch square legs only. No cross braces are used, yet this device is absolutely rigid. When leg is open it automatically clicks into position. Simply press the button to close. Very easy to install and is a complete unit in itself, not depending on the table rim for strength. The sleeve, or exposed part is finished statuary bronze. Parts not exposed are plain steel. Two saw cuts on the inside rim of the table are necessary to allow hooks to engage the steel. Complete with all screws.

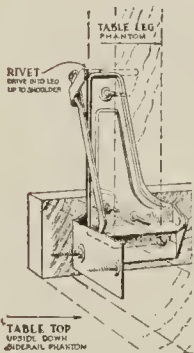

Price per set of four braces.....80c  
Per dozen sets.....\$8.50  
Shipping weight, per single set, 2 pounds.

No. 333—Card Table Leg Support. A new equipment just being placed on the market. Without doubt the most simple, practical and durable device ever patented for this purpose. Besides being a rigid leg support the table corner is solidly braced. The leg automatically locks when opened and a slight pressure on the diagonal brace unlocks. This fixture takes a 1 inch square leg. Finished in brown japanned. Complete with screws. Per set of four supports.....50c  
Dozen set lots, per set.....45c

Shipping weight, per single set, 2 pounds.

No. 333

No. 448 Table Leg Support. For tables having depth inside of  $1\frac{1}{2}$  inches or more. By using wider rim, legs up to  $1\frac{3}{4}$  inches square may be used. In attaching, a hole is drilled in the leg to receive the rivet, which serves as a bearing surface for the sliding arm. Support locks open and friction arrangement holds leg when closed. Mahogany lacquer finish, complete with screws. Per set of four 66c; dozen sets.....\$6.50

Shipping weight two pounds per set.

## CARD TABLE FITTINGS

No. 500 Table Set—Includes all the hardware necessary to make a table, the same as put out by commercial table manufacturers. This outfit includes the four braces, four nicked corner irons, cups to be used as hinges and the necessary rivets. Per set complete.....45c Doz. sets.....\$4.80

Shipping weight, per single set, 2 pounds.

Size  $\frac{1}{2}$  inch by 10  $\frac{1}{2}$  inches.

No. 61 Heavy Card Table Leg Brace—Brass plated, complete with screws. These braces come right and left. If legs are to fold all in same direction order all rights or all lefts, as you wish. If legs are to fold in pairs order two rights and two lefts for a table. Price, each, either right or left.....12c. Per dozen.....\$1.15  
Shipping weight, per single set, 2 pounds.

## CLOCK MOVEMENTS

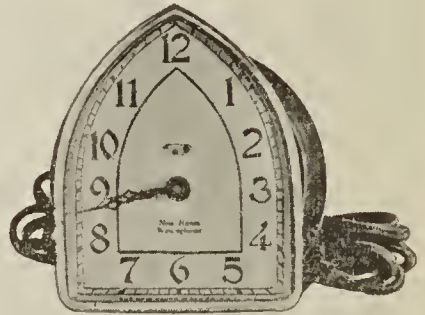

These clocks are all New Haven make, built for quality, rather than price. We have sold many thousands of these movements and our repeat business assures us they are giving good satisfaction. Spring numbers are all one day, accurate time keepers. The electric movements are for 60 cycle, 110 to 120 volts A. C. Motors are slow running, long lived and unusually quiet. They are manual starting and dot indicator shows when motor is running. All our clocks are guaranteed to give satisfactory service under ordinary usage. We cannot accept responsibility for movements damaged thru dropping or other misuse, nor for electric movements ruined by use on wrong current.

Key to Measurements. "A" size of face. "B" depth of case from back of dial, exclusive of any winding keys. "C" diameter of case. "D" allowable variation of thickness of wood to which case is clamped. To install these clocks hole in wood should be bored just large enough to admit the case, back of the dial catching against the wood. Movement is held in place by a back plate (adjustable on long threaded posts) which is bolted up against the back side of the wood.

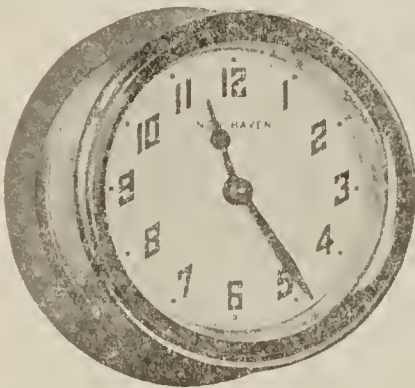

Movements may be assorted to take advantage of the quantity prices.

No. 3E—Gothic Electric Movement. Nonbreakable convex crystal, nickel bezel, white dial, black numerals and hands. "A"  $2\frac{3}{8}$  in. x  $3\frac{1}{8}$  in.; "B"  $1\frac{1}{2}$  in.; "C"  $2\frac{1}{4}$  in.; "D"  $\frac{3}{4}$  in. to  $1\frac{1}{4}$  in. Price each.....\$2.05

### GRANDFATHER CLOCK UNIT

For 60 cycle A. C. 80-135 volts.

This is high grade equipment. The heavy dial is nine inches square, 24 gauge bronze, beautifully etched. Finish is frosted and bright bronze with black enamel minute track. The attractive hour, minute and second hands are black. The electric movement is "Hammond" make, slow running, dependable and lasting. The hand set and starting is either front or rear as explained under "Hammond Movements Only" on page No. 58 of this catalog. For convenience in shipping motor is sent not attached to dial. Assembly may be made in a few minutes by following instructions on the same page and noting directions for putting on hands as explained on page No. 59. This unit is complete with 12 feet rubber cord and plug and brass screws for attaching dial to case.

No. 101E—Clock Unit. Price each.....\$4.50  
Lots of six each.....\$4.25

## HAMMOND SYNCHRONOUS ELECTRIC CLOCK MOVEMENTS

We sell Hammond movements because of their reputation and the satisfactory service they have given our customers over many years. Motors are slow running, quiet and should give excellent service over a period of many years. These movements are for 60 cycle, alternating current, 80 to 135 volts. They are manual starting. Entire mechanism is enclosed in dust proof case. Lenses are clear convex glass. Dials are buff colored on metal, with black numerals set in dull gold border. Bezel is gold bronze. Hour and minute hands are black, the second hand dull brass. Each movement complete with 6 feet of rubber cord and plug. Adjustable back plate. A 3 27-32 hole is required and from 1 ½ in. to 1 ¾ in. thickness of wood.

Guaranteed for one year against defects in material and workmanship.

No. 6 Movement. 4 inch dial, each \$3.20, lots of six each \$3.10; doz lots each.....\$3.00

No. 7 Movement. 5 ⅜ inch dial. Each \$3.60; lots of six each \$3.50; doz lots each....\$3.40

No. 6A Movement. Same as No. 6, but with buzzer type alarm, each \$3.60; lots of six each \$3.50; doz. lots each.....\$3.40

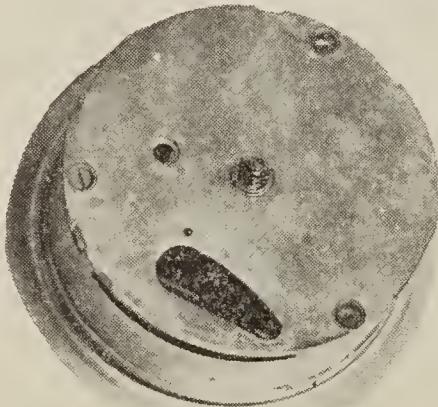

### HAMMOND MOVEMENT ONLY

60 Cycle A. C. 80-135 Volts.

As illustrated, movement only. Size 1 ⅝ in. deep by 3 ¾ in diameter. Hand bushings come in two lengths, the short length for metal dials up to 1-32 in. thick and the long length for dials up to ½ in. thick. On dials less than ½ in. thick and more than 1-32 in. use long length hand bushing and spacing washers between back of the dial and front of the case. Metal dials not over 1-32 in. thick may be screwed to the movement by removing and using the three brass screws on the front of the case. When removing these screws use care that case does not fall apart and throw gears out of place.

Dials up to ½ inch thick may also be screwed to movement case using 1 ¼ inch round head brass machine screws which we will include, on request, without charge.

Electric clock movements must not be mounted close to or surrounded by iron or steel. These movements come equipped with 6 inch leads, not cord sets. We also list them with and without back plates. If screwed to dial back plate is not necessary. If to be clamped in a case, back plate should be ordered. These movements are manual start, either by button at rear or in front. For front operation the clock is set by moving the hands with the finger and started by turning off current, turning the second hand with the fingers and immediately turning on the current.

No. 9290 Long Hand Bushing Unit or No. 9258 Short Hand Bushing Unit, complete with back, each \$2.25; lots of six each \$2.15; doz. lots each.....\$2.05

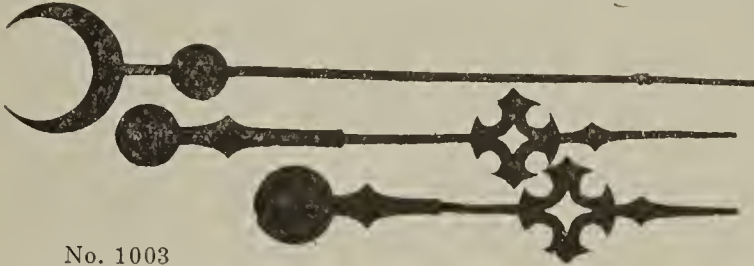

No. 9290NB or 9258NB Units, without backs, each 15c less than above.

CLOCK HANDS TO FIT HAMMOND MOVEMENTS

## CAST METAL DOGS

**METAL DOGS.** Used as unique decorations on ash trays, novelties, etc. These animals are die cast from a lead mixture and show an unusual amount of detail. They are not painted. Dip in gasoline and then paint two thin coats, coloring as you wish. To fasten to wood drill small hole and screw will cut its own thread. Feet may be soldered to metal, using small amount of acid core wire solder.

**WROUGHT STEEL LEG BRACES—CADMIUM PLATED**

These braces have a positive locking feature which is easy to operate. Nos. 446 ¼ and 446 ½ are designed for use on ping-pong and similar type tables. These braces insure rigidity when opened and when closed permit the legs to be folded flat against the table. No. 446 ¼ is applied from the under side of the table to the leg. No. 446 ½ is made without a base, for use on tables having reinforcing rails along the edges. No. 446 is a very heavy brace and is designed for use on temporary banquet tables, folding counters, wall racks, etc. Also used extensively as a step-ladder brace. All above braces come either rights or lefts complete with screws. In case four braces are ordered we will ship two rights and two lefts unless otherwise instructed.

Brace Number	Shipping Weight 4 Pcs.	Length Overall (Inches)	Width (Inches)	Gauge (Inches)	Price Each

No. 701 Top—Full crates of five tops. Weight 150 lbs. No crating charge. Per top 5.50

## PORCELAIN TOPS FOR BREAKFAST TABLES

Set consists of two leaves each 10 ½ in. by 40 in. and one center 25 in. by 40 in. First quality porcelain. Green triangle and diamond on ivory background.

No. 500 Top Set, each.....\$8.00

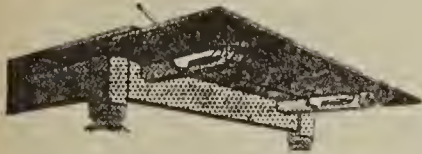

Note—On request we will submit print showing design of this top.

No. 216C-33 1/2 Equalizing Table Slide Equipment. Complete with heavy grooved beams, 3 1/4"x56". This slide extends sufficiently to accommodate three 10" leaves. When one side of table is opened the opposite side opens at the same time. This is the best and most practical device on the market and is used by most manufacturers of high grade tables. Price per set of two slides and complete hardware.....\$3.75  
Shipping weight per set 26 lbs.

No. 595—Refectory Table Equipment. Set consists of four hooks and four pins. Leaves move smoothly when opened and lock in place at the level of the fixed top. Illustration at the top shows table extended with leaves locked in place. Illustration at bottom shows leaves concealed. Price including patent rights and royalty, per set.....75c  
Weight, per set, 1 lb.

No. 410—Refectory Table Equipment. A simple and satisfactory device. Operates with spring action and has self-leveling feature. Straight slides are used, not shaped. Can be used on tops from 13-16 inch to 1 1/4 inch in thickness. Device attaches to same side of both slides. Price per set of four complete.....\$1.40  
Weights, per set, 3 lbs.

No. 2897—Table Leaf Extension Equalizer. Plain steel. Fasten under center of table with one end of equalizer attached to each side. When leaf is pulled out, leaf on the other side will pull out automatically same distance (a maximum of 14" from center of swivel). Complete with screws, each 35c  
Per dozen .....\$3.70

## EXTENSION TABLE SLIDES

These are very high grade slides and have long lap, to insure rigidity. They are made for non-dividing pedestal tables and will allow a 48 inch to 54 inch top to open to specified length.

Price, extension 6 feet,  
per set .....\$1.75  
Price, extension 8 feet,  
per set .....\$2.75

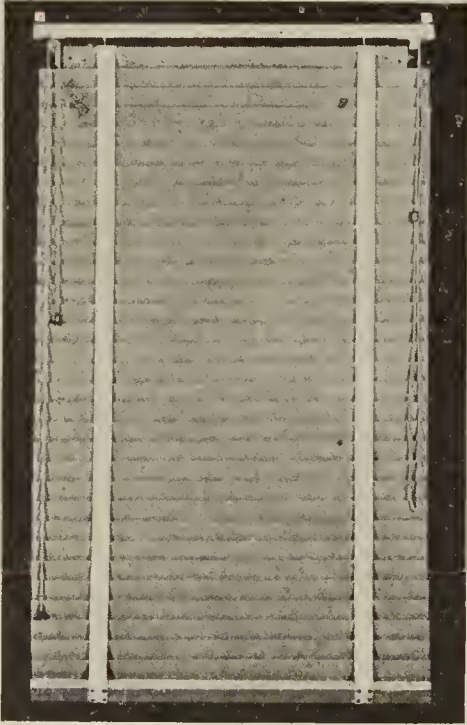

TABLE TOP LOCK

No. 15 Lock—To hold the two halves of dining table together. Works with small hand wheel close to tabel rim and locks top solidly. For use on 48 in. to 54 in. tops. Price each.....28c

## MATERIALS FOR VENETIAN BLINDS

These blinds are both decorative and practical and are in big demand for homes, offices, schools, public buildings, etc. They are easy to construct and with the materials we offer can be made at a very considerable saving over the cost of factory made blinds. We are selling these materials in all parts of the country and many of our customers have built up considerable business, making and selling these blinds. All the parts we offer are very highest grade and will compare favorably with best factory made product.

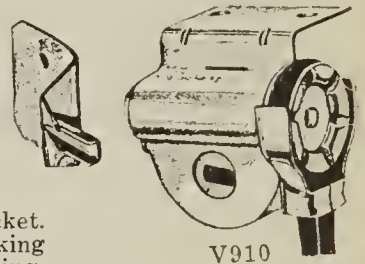

We do not sell any wood parts. Most of our customers are equipped and prefer to make their own slats and rails. These are easily made and most any available wood, which is thoroughly dry, straight grained and with little tendency to warp, is satisfactory. Wood parts are usually enameled, altho some of the new blinds are stained and varnished, with very pleasing results.

## VENETIAN BLIND HARDWARE

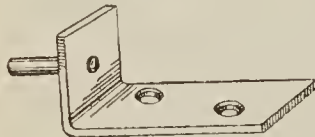

Cadmium plated with screws. Half size illustrations.

No. V910 Tiltor. Fully enclosed. Smooth and powerful in action. Brass worm gear. New principles reduce cord crawling to a minimum. Each 45c; doz.....\$4.80

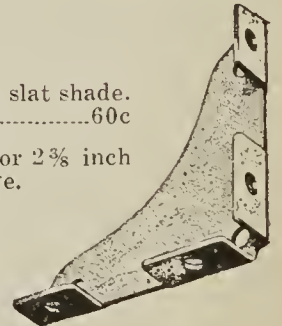

No. V163K Cord Brake and Bracket. Has pin end lock. Positive locking action. No cord slip or chattering. Price, each 12c; doz.....\$1.35

V138

No. V102 Brackets. For 2 in. wide slat shade. Per pair 6c; doz. pair.....60c

No. V103  $\frac{3}{8}$  Brackets. As above for 2  $\frac{3}{8}$  inch wide slat shade. Priced as above.

V102

V120

No. V138 Pin End Clip. Each 5c; doz.....50c

No. V120 Cord Equalizers. Nickel plated. Smooth, with round edges. Per doz.....5c

No. V180 WO Pulley. Lignum Vitae, oil impregnated. Each 2c; doz.....15c

V180

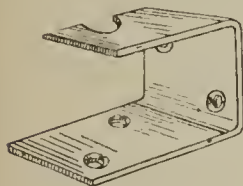

V185

No. V185 Pulley. Ball bearing, steel, rustproof. Size  $\frac{3}{4}$  inch diam. by  $\frac{1}{2}$  inch long. For use on heavy blinds or any blind where perfectly smooth, quiet action is essential. Each 15c; doz.....\$1.50

V125 Tassel. Nickel plated with soft rubber ring. Recessed at bottom to conceal knot. Each 5c; doz.....50c

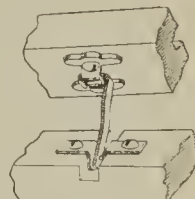

V125

V189

No. V189 Head Center Bar Support. Used to prevent sagging of head bar on wide blinds. Each 9c; doz.....85c

No. V191 Center Support for Tilt Bar. An ingenious and attractive looking support. Each 8c; doz.....75c

No. V200 Hardware Set. Consists of one each V910, V163K, V120, V138 and two each V102, V180, V125. Also screws and brass nails. Per set.....70c  
Doz. sets, \$7.80; 50 sets.....\$30.00

No. V201 Hardware Set. As above, except two V185 pulleys instead of V180. Set .. 90c  
Doz. sets, \$10.20; 50 sets.....\$40.00

Installation Bracket No. V102  $\frac{3}{8}$  may be had in place of No. V102 at no additional cost.

### LADDER TAPE AND CORD

Tape is excellent quality, tightly woven, evenly spaced, width  $1\frac{1}{2}$  inch. Cord is size  $4\frac{1}{2}$  tightly braided.

No. 802D Tape. For 2 inch slats. Cream duck color. Per yd.....14c  
72 yd. rolls, weight 5 lbs., each \$8.25; 144 yd. rolls.....\$15.75

No. 802C Tape. For 2 inch slats. Chocolate color. Per yd.....15c  
72 yd. rolls, weight 5 lbs., each \$9.25; 144 yd. rolls.....\$17.50

In case tapes are wanted for 2  $\frac{3}{8}$  inch wide slats order 802  $\frac{3}{8}$  D or 802  $\frac{3}{8}$  C. Price same as above.

No. 804D Cord. Cream duck color. Per yd. 3c; 100 yd. balls, weight 2  $\frac{1}{2}$  lbs., each \$2.10; 500 yd. spools, each.....\$8.50

No. 804C Cord. Chocolate color. Per yd. 3c; 100 yd. balls, weight 2  $\frac{1}{2}$  lbs. each..\$2.20  
500 yd. spools, each.....\$9.25

### HINTS FOR ASSEMBLING

Venetian blinds are becoming so common that few instructions are necessary. Three rails are used, the bottom and tilt rail being alike and the top rail being machined out on the upper side for cords and pulleys. Top rail is fitted between brackets V102. Tiltor V910 goes on under side of left end of top rail, and V163K on the right. Tiltor pin screws to one end of tilt rail, V138 to the other. Tapes should be ordered as long as height of the opening. For wide shades they should be used about 18 inches apart. Cords should be ordered six times the height of the opening plus twice the extra width, if wider than 36 inches. Tapes are fastened on the top of the tilt rail and on the bottom of the bottom rail, with brass nails. To thread pull up cord, run both cut ends up thru cord brake. Run one end over pulley (located in front of first hole) down thru hole in top rail, thru slots in tilt rail and slats, thru hole in bottom rail and knot. Run other end over pulley (located in front of second hole) and continue down to bottom. Wire nails are driven thru for pulley axles. Cord equalizer goes on pull up cords, tassels on the tilt cord.

# CATALIN

## The "Gem of Modern Plastics"

Catalin is cast phenol resin, a solid material. For commercial purposes it is practically unbreakable. It is non-inflammable, odorless, tasteless, moisture proof and resists alcohol, oil and all common acids. Catalin is worked similar to wood or soft metal. Many useful and beautiful articles may easily be made in home or school workshop with ordinary equipment. The proper methods of working and designs for manufacturing are a voluminous subject and we suggest you purchase one of the many inexpensive and instructive books now on the market. On request we will be glad to give you information as to where these may be obtained.

**Working**—Catalin may easily be drilled, shaped, turned, bent and carved with ordinary shop equipment. Pieces may be permanently cemented together using Catalin cement.

**Polishing**—Catalin, as it comes from the mill and as we sell it, is not polished. The unequalled beauty is only brought out by careful polishing, with fine abrasive papers, powdered pumice stone and lastly, Catalin Special Polishing Compound.

We suggest a few of the articles which may easily be made from this plastic. Rings, bracelets, costume jewelry, earrings, buttons, chess sets; napkin rings, letter openers, inlays, drawer pulls, clock dials, ash trays, cigarette holders and boxes, desk pen bases, lamp parts, poker chips, salt and pepper shakers, candle sockets, trays, frames for photographs, etc.

### Colors

No. 201 White	No. 584 Rose Quartz
No. 515 Mottled Red	No. 612 Tortoise Shell
No. 516 Mottled Jade Green	No. 1530 Cloudy Amber
